INTRODUCTION

---- x IN SHORT x ----

THE WORLD HAS CHANGED

HAVE YOU CHANGED YOUR WAY
OF PRESENTATION?

HERE'S A TIP:

GO 3D

-----X-----

with DFLIP

---- x PLUS x ----

GONE ARE THE DAYS
WHEN YOU HAD TO LIMIT WITH
TEXT AND IMAGES

GO PDF

And yet:

WE SUPPORT IMAGE AND TEXT TOO!!

YEAH WE GOT FALLBACKS COVERED ;)

How cool is that!!

SO WHAT'S THE DEAL WITH 3D!!

Technology has improved a lot. We also try to improve it a bit. While 3D in desktop and games looks great, 3D in web aka WebGL is still at it's infancy but shows great promise.

We have tried our great deal to optimize the power and enhance your experience. As a result, now we have:

1. [Optimized 3D](#) structure based on THREE.js and our Mockup.js.
2. [On Demand Smart Rendering](#), that minimizes the CPU and RAM usage of your computer.
3. [Realistic 3D Paper](#) – straight from the powerful mockup library with great flexibility and promise.
4. [SMART Memory Management](#) – Along with already great browser engines we have optimized our plugin to stay low on memory with proper memory cleaning.

IN SHORT:

3D is now smooth, less resource hungry, realistic and feasible for web.

EVEN A KID KNOWS 3D IS BETTER,
BUT USING 3D IS NO
CHILD'S PLAY.

THAT'S WHERE WE GET IN..
